

Building Cooperation Through Popular Education

What is Popular Education?

Founded in October 2009 in response to growing economic inequality, Cooperation Texas believes everyone deserves equal access to **dignified jobs** where workers have a direct say over key decisions that affect their workplace, share the profits and losses equitably amongst themselves, and enjoy the dignity and security that comes with having a direct stake and a voice in their business.

□ The mission of Cooperation Texas is to create **sustainable jobs** through the development, support and promotion of worker-owned cooperatives in Texas.

□ We envision an inclusive Texas economy with business built on the values of **democracy, sustainability and cooperation**, offering dignified jobs with a living wage, benefits and asset building opportunities for all workers.
